

Quartz light guide

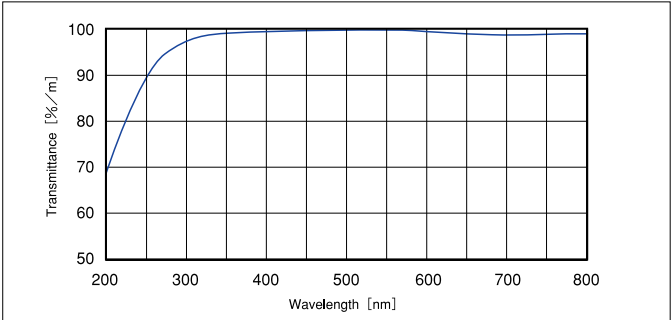

▶ Only for high-intensity xenon lamp and UV light source.

Quartz fiber is excellent at UV transmittance and heat resistance and used for UV lighting or high intensity. We offer a quartz fiber for MUV-200, UV light source, and MKN-500, xenon light source. Special configuration of light guides can be designed for various requirements.

Light Source for multi-consistent glass fiber
MKN-500 / MUV-200

■ Transmittance of quartz fiber

* Above graph is the value when the length of fiber is 1m.
